Why do you want to be an egg donor and if you had a message for your recipient what would it be?	I would love the opportunity to help people start a family of their own as I know how much my family means to me. I would love to do whatever I can to help others and family is the most important thing, so to be able to help someone with that would be the highest honour to me. To bring joy and the miracle of life to people who can not do it themselves, would bring as much joy to my heart as it would to theirs.
How do you best describe yourself?	I am a loving and caring person that might talk too much, but also knows how important 'me' time is. I am patient and always try to be kind to everyone, however I do not back down when people try to walk over or manipulate me. I have a strong sense of identity, I know who I am and what I want out of life, but I do realize that life does sometimes through curve balls and not everything works out as planned, that is why I also do pride myself in being adaptable, being able to read situations and people, then applying

	the correct behaviour towards it. I am very in control of my emotions, but I love life, I love love and I love people, thus I try to see the positives in everything and situation. I care, protect and fight for those I love but also try and keep an open and logical mind when I do not agree with them. I have a good temper and do not anger easily. I have a good sense of humour and choose to surround myself with people that make me happy and make me laugh because I do not have time for negative or fake people that want to rain on my parade.
