	<p>smoker. Reason for donating: I wanted to look into egg donation as my sister struggled to conceive children of her own, and went through the process of IV, and I saw how hard this was for her, and I so wish I could have done something to help her. My mother is a midwife, so we learned a lot about pregnancy and birth growing up, and how amazing the process was. I have been very lucky to fall pregnant very easily twice, and had 2 amazing home birth experiences with two very healthy babies. I would love to be able to bless someone else with this experience as having children was the best thing that ever happened to me, sleepless nights and all.</p>
Reproduction history:	<p>Two healthy babies, first weighing at 4.1kg. and second 3.8kg. Proven egg donor resulting in pregnancies.</p>
Views on religion and spirituality:	<p>I am non religious myself. I believe that it doesn't matter what you believe in, the most important thing is that we are kind and respectful of one another.</p>
