Behavioural Traits

What is most important in life to you?	Family
If you had unlimited resources and could save one thing on earth what would it be?	I would open up good schools and colleges providing quality education at prices to be afforded by all. I would also start a community service centre wherein people could grow food, cook and eat by collective effort (for the benefit of everyone involved) at low prices. It would not require profit as everyone involved in working would have what they would need. The world is riddled with consumerism and capitalism. I would like to tackle this issue by promoting the use of necessity goods. If you want a shoe, go buy it from the community center where the price is only marginally above the manufacturing cost. It would require extensive use forward and

	backward integration but in the end, it would be worth it.
