

baby2mom Egg Donation Criteria

Being an egg donor is a very special contribution. Giving the recipient the very best chance to conceive is important. For this reason, whilst we are so grateful for the kindness and generosity of ladies willing to sign up, it is important to check that such ladies are best suited to help recipients conceive - and that the process does not compromise our willing helpers who become donors.

More about specific criteria can be found from the following links:

- BMI, please see more about this [here](#).
- Age of donors, [see SASREG requirements](#), especially point 2g.
- [Hereditary conditions](#), such as bipolar
- [Donors being based within South Africa](#)
- [Donors willing to inject themselves](#)
- Acceptance of egg donation as stipulated by the Department of Health, [see SASREG requirements](#), especially point 2g.
- Anonymity of donors, [see SASREG requirements](#), especially point 2f.
